Felt Needle Case

Every stitcher needs a safe place to store hand sewing needles. Make this easy felt needle case by hand or machine.
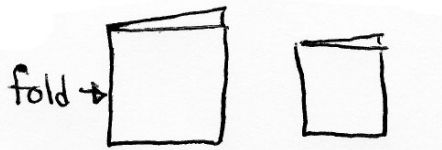

1

Cut one piece of felt for the cover and a contrasting piece for the page.

*Cut-out patterns on page 2*

2

Fold each piece in half like a book and press a crease with an iron on both sections

3

Cut a flower petal and leaf to decorate the cover. Place the leaf on the cover first, center the flower petal over the leaf, and position a pretty button on top. Use a needle and double thread to sew on the button - which will attach the flower and leaf at the same time.

4

Now center the "page" on top of the "cover". Stitch down the center fold by machine or hand.

5

Add sewing needles to the pages.

Other designs could include an initial, needle, thread spool, or just sew on some pretty buttons.
